

SNEHA GHOSH

📍 Kolkata, West Bengal, India ✉ snehanew2003@gmail.com ☎ (+91) 9832178973 📄 Personal Portfolio in Sneha Ghosh
🔗 SnehaGhoshNew2003

OVERVIEW

Final-year B.Tech student and highly motivated Data Science enthusiast with hands-on experience in data preprocessing, machine learning, and deploying end-to-end analytical solutions using Python, SQL, and Streamlit. Proficient in EDA, model building, and result interpretation, with strong knowledge of tools such as TensorFlow, Keras, Power BI, and Langchain. Skilled in transforming business problems into data-driven insights. Seeking an AI/ML internship or entry-level role to contribute to impactful product development, thrive in fast-paced environments, and grow continuously in the field of applied data science.

EDUCATION

College of Engineering and Management, Kolaghat Bachelor of Technology in Information Technology CGPA: 8.21	<i>2021 – 2025</i>
Kendriya Vidyalaya Ranaghat Class XII, Science Percentage: 87.4	<i>2020 – 2021</i>
Kendriya Vidyalaya Ranaghat Class X, General Percentage: 85.8	<i>2018 – 2019</i>

SKILLS

Technical Skills : Python, SQL, Statistics, Probability, Linear Algebra, Calculus
Technical Tools : Power BI, Excel, Numpy, Pandas, Matplotlib, Scipy, statsmodels, Tensorflow, Keras, Langchain
Soft Skills : Adaptability, Growth Mindset, Open to feedbacks, Communication Skills

CERTIFICATIONS

- Udemy: The Data Science Course – Complete Data Science Bootcamp (2025)** Key learnings:
- Learned data preprocessing, feature engineering, and core ML mathematics.
 - Built regression models using Python with NumPy and scikit-learn.
 - Applied deep learning concepts with TensorFlow, handling model tuning.
- TCS iON: IIT Kharagpur AI4ICPS Certificate Programme** Highlights:
- Gained insights into industry-level AI applications and ML workflows.
 - Studied key algorithms: SVM, KNN, Naïve Bayes, and clustering techniques.
 - Explored deep learning, transformers, computer vision, and fine-tuning.

PROJECTS

Application Tracking System ◦ Developed an interactive ATS using Streamlit to evaluate resumes against job descriptions. ◦ Integrated Gemini API to compute compatibility scores and highlight missing keywords. ◦ Used pdf2image and PIL for extracting and analyzing resume content.	Click here 🔗
Sentiment Analysis ◦ Built an LSTM-based model for classifying sentiment in customer reviews. ◦ Preprocessed text using NLTK and tokenized with word embeddings for input sequences.	Click here 🔗
Image Captioning ◦ Implemented a CNN-RNN model using Xception for image features and LSTM for captions. ◦ Trained on Flickr8k dataset using TensorFlow and Keras for optimization.	Click here 🔗
Yoga Pose Detection and Prediction ◦ Built a deep learning system to detect and classify yoga poses in images and videos. ◦ Used YOLO for body part detection and VGG16 for accurate classification. ◦ Integrated real-time feedback and pose correction visualization in the interface.	Click here 🔗

DASHBOARDS

Hospitality Domain: Created a Hospitality Domain Analysis using Power BI [See it here]
Sales Analysis: Created a Sales Insight using Power BI. [See it here]
